**BE PREPARED FOR AN EMERGENCY**  
**First Response Time is Critical!**

Communications are vital to the success and best outcomes of emergency management. Implementing the right system can save lives when disaster strikes. AARC-EVAC offers an autonomous wireless-linked system providing best practice.

✓ **Standard sirens & voice messages**

✓ **S.O.S** Zoned call for assistance

✓ **Evacuation** Zoned assembly messages

✓ **Lockdown** Discrete alert or public warning to suit the application

# What is AARC-EVAC?

**A system to suit just about any environment.**

Autonomous, self-contained receivers eliminate the single-point-of-failure of traditional P.A. based systems.

### Medical

- Doctors Clinics
- Dental Surgeries
- Veterinary Clinics

## Help is just a click away!

### Evacuation

Triggers Australian Standard Evacuation Tones plus a customisable recorded message ordering an evacuation of the premises.

### Alert

Triggers an Australian Standard Alert Tone as an awareness warning. The system can be programmed to automatically trigger Evacuation if not cancelled after a set time.

### Lockdown

Triggers a covert recorded message or a public warning signalling personnel to begin a lockdown procedure in the event that an external threat is identified.

### S.O.S./Duress

Single or Multiple Alert Panels can trigger a zoned message, customised to call for assistance to its particular zone. Up to 6 customisable message zones can be established within each system.
